.08(a)-(f)-Allergies and Disabilities

Finding

591-1-1-.08(a)-(f) requires Center Staff to maintain a file for each child while such child is in care and for one year after that child is no longer enrolled that includes the following information: (a) child's name, birth date, sex, address, living arrangement, name of school if applicable; (b) names of both Parents, home and work addresses, and home and work telephone numbers; (c) name(s) and addresses of the person(s) to whom the child may be released including address, telephone number, relationship to child and other identifying information; (d) name(s) and telephone number(s) of person(s) to contact in emergencies when the Parent cannot be reached; (e) name and telephone number of the child's primary source of health care; and (f) known allergies, physical problems, mental health disorders, mental retardation or developmental disabilities which limit the child's participation in the program. It was determined based on the consultant's review of six child records that one child record is missing information for known allergies, physical problems or mental health disorders.

POI (Plan of Improvement)

Center staff will develop a plan that includes how to obtain all required information for currently enrolled children and how to ensure this is done for future enrollees as well. The plan will also include how and where to maintain files for the required amount of time. The plan will be implemented and followed.

Finding

591-1-1-.26(4) requires that playgrounds be protected from traffic or other hazards by a (4) four foot high fence or other barrier approved by this Department. Fencing material shall not present a hazard to children and shall be maintained so as to prevent children from leaving the playground area by any means other than through an approved access route. Fence gates shall be kept closed except when persons are entering or exiting the area. It was determined based on the consultant's observation that one main structure post is rotten at the bottom of the wood fence located on the back right hand side of the child play area, causing two eight foot fence panels to be instable and a hazard to all children when utilizing the child play area.

POI (Plan of Improvement)

The center director will ensure the structure post is replaced and the wood fencing is secure and tight.
