Fencing material shall not present a hazard to children and shall be maintained so as to prevent children from leaving the playground area by any means other than through an approved access route. Fence gates shall be kept closed except when persons are entering or exiting the area. It was determined based on the consultant's observation that the fencing on the right and left hand side of the playground measured approximately forty-four inches instead of forty-eight due to pile up of resilient materials. It was further determined based on the consultant's observation that the fencing on the back middle section measured approximately forty-three inches instead of forty-eight inches as required due to the pile up of resilient materials.

POI (Plan of Improvement)

The Center will routinely check the fence to determine if it is in good repair and remains at least 4 feet high, and will repair any hazards. The Center will train Staff to identify and report any fence hazards and to keep the fence gates closed when not in use.
