The following information is associated with a Complaint Investigation Follow Up:

Facility

591-1-1-.19 License Capacity(CR)

Not Met

Finding

591-1-1-.19(1) requires a Center to provide 35 square feet of usable space per child, which will determine the Center's License capacity. It was determined based on observation that the licensed capacity was not met. There were 17 children present in a room that is licensed for 15.

POI (Plan of Improvement)

The Center will limit the number of children in this space to the licensed capacity.

Correction Deadline: 4/18/2018

Sleeping & Resting Equipment

Finding

591-1-1-.30(2) requires the Center to provide a safe sleep environment in accordance with American Academy of Pediatrics (AAP), Consumer Product Safety Commission (CPSC) and American Society for Testing and Materials (ASTM) recommendations as listed in these rules for all infants. Center Staff shall place an infant to sleep on the infant's back in a crib unless the Center has been provided a physician's written statement authorizing another sleep position for that particular infant that includes how the infant shall be placed to sleep and a time frame that the instructions are to be followed. When an infant can easily turn over from back to front and back again, Staff shall continue to put the infant to sleep initially on the infant's back but allow the infant to roll over into his or her preferred position and not re-position the infant. Sleepers, sleep sacks and wearable blankets that fit according to the commercial manufacturer's guidelines and will not slide up around the infant's face may be used when necessary for the comfort of the sleeping infant. Swaddling shall not be used unless the Center has been provided a physician's written statement authorizing its use for a particular infant that includes instructions and a time frame for swaddling the infant. Center Staff shall not place objects or allow objects to be placed in or on the crib with an infant such as but not limited to toys, pillows, quilts, comforters, bumper pads, sheepskins, stuffed toys, or other soft items and shall not attach objects or allow objects to be attached to a crib with a sleeping infant, such as, but not limited to, crib gyms, toys, mirrors and mobiles. It was determined based on observation that the safe sleep requirements had not been met. Consultant observed that all 6 of the cribs in the infant room had items in/attached to them. There were 3 blankets in cribs and 16 toys/mirrors/animals attached to the cribs. There was one infant in a crib that had a blanket in it and 2 toys attached to it.

POI (Plan of Improvement)

The Center will take all steps necessary to provide a safe sleep environment for infants as listed in these rules; will train Staff to follow these rules; and will monitor for compliance.

Staffing and Supervision

Finding

591-1-1-.32(7) requires that children be supervised at all times and that the persons supervising in the child care area be alert, able to respond promptly to the needs and actions of the children being supervised, as well as the actions of the chaperones and Students-in-Training, and provide timely attention to the children's actions and needs. It was determined based on consultant observation that upon arrival to the center one staff member was present with children located in the middle, left and right rooms the staff member was present in the left room upon arrival and then positioned herself in the doorway of the left and middle rooms. In addition, the director, who was the staff member in the right room once the rooms split for the day was observed to walk out of the room into the kitchen to gather breakfast items.

POI (Plan of Improvement)

The Center will train Staff and monitor to ensure they are providing supervision and watchful oversight to the children at all times.
