Comment

Discussed adding equipment and toys to enhance variety.

Finding

591-1-1-.12(2) requires that all equipment and furniture be free from hazardous conditions such as, but not limited to, sharp rough edges or toxic paint; and be kept clean. It was determined based on the consultant's observation that the white little tikes kitchen in the middle right classroom was missing the opening to the door causing a potential entrapment hazard. It was further determined based on the consultant's observation that the white cabinet located on the left hand side of the room is missing the window opening to the door causing a potential entrapment hazard. Additionally there was a Graco baby swing that was not in good repair and safe.

POI (Plan of Improvement)

The Center will ensure that equipment and furniture are used by the age-appropriate group of children.

Trees located on the site or that encroach onto the site from adjacent properties may have structural issues that present an elevated level of risk. Consider having these trees inspected by a certified arborist to determine their structural integrity and associated levels of risk.

Finding

591-1-1-.26(8) requires climbing and swinging equipment to have a resilient surface beneath the equipment and the fall zone from such equipment must be adequately maintained by the Center to assure continuing resiliency. It was determined based on the consultant's observation that the red merry go round, the double silver slide, and the white climbing structure had less than three inches of resilient surface beneath the equipment on this date.

POI (Plan of Improvement)

The Center will add additional resilient surfacing to the fall zones where needed and check daily, adding resilient surfacing as needed to maintain adequate resiliency.
