Technical Assistance

Discussed and corrected during the visit: removing fallen limbs, mushrooms, protruding nails on the white fence, securing a loose board on the white fence, and securing the water shut-off supply cover, so children are not able to open it and fall in the hole.

Finding

591-1-1-.26(4) requires that playgrounds be protected from traffic or other hazards by a (4) four foot high fence or other barrier approved by this Department. Fencing material shall not present a hazard to children and shall be maintained so as to prevent children from leaving the playground area by any means other than through an approved access route. Fence gates shall be kept closed except when persons are entering or exiting the area. It was determined based on observation that the following was present:

- A portion of the chain link fencing was not attached to the ground at the front left
- Chipping paint was present on the white wooden fence along the left side of the playground. In addition a 4 inch gap was present between the fence and ground at the back left corner of the playground.

POI (Plan of Improvement)

The Center will routinely check the fence to determine if it is in good repair and remains at least 4 feet high, and will repair any hazards. The Center will train Staff to identify and report any fence hazards and to keep the fence gates closed when not in use.
