290-2-3-.11(2)(c) requires that documentation of drills required by these rules shall be maintained in the Home. The Home shall conduct drills for fire, tornado, and other emergency situations. The fire drills will be conducted monthly and tornado and other emergency situation drills will be conducted every six months. The Home shall maintain documentation of the dates and times of these drills for two years. It was determined based on observation and staff statements that no fire drills had been completed since September 6, 2025. Additionally, the log did not show that any other emergency drills for tornados or other emergency situations had been conducted during the 2025 calendar year.

POI (Plan of Improvement)

The Provider will develop and implement a plan and schedule for conducting the required drills, completing the documentation, keeping the documentation on file for two years.

290-2-3-.13 Physical Plant-Structural/Mechanical(CR)**Met****Comment**

The Home appeared clean and free from hazards.

290-2-3-.13 Playgrounds(CR)**Not Met****Finding**

290-2-3-.13(2)(a) requires that outdoor play areas be kept clean and free of hazards such as exposed sharp corners of concrete or equipment, rust and splinters on equipment, broken glass, open drainage ditches, holes and stagnant water. It was determined based on observation that hazards were present on the outdoor play area as follows:

1. The PVC pipe surrounding the area by the swings/slide equipment was disconnected in three places.
2. Weed mat was exposed beneath and in the fall zone of the swings and slides where the resilient material had worn away and created a tripping hazard for the children.

POI (Plan of Improvement)

The Home will repair any and all identified outdoor hazards and will monitor playground daily or more often as needed to ensure that the Home's outdoor play area is kept clean and free of hazards.

Correction Deadline: 12/31/2025

Finding

290-2-3-.13(2)(c) requires that climbing and swinging equipment that are not portable have a resilient surface beneath the equipment and the fall zone from such equipment, which is adequately maintained by the Home to assure continuing resiliency. It was determined based on observation that there was inadequate resilient surfacing beneath and in the fall zones of the swings and slides, and measured less than an inch in some areas. Based on the height of this equipment, a minimum depth of 6 inches of resilient surfacing was required. Additionally, the rock climbing wall structure had no resilient surface beneath and in the fall zone, when 6 inches was required.

POI (Plan of Improvement)

The Home will ensure that there is an adequate resilient surface under and in the fall zone of climbing and swinging equipment. The Home will inspect equipment and resilient surfacing material regularly and repair or replenish as needed.

Correction Deadline: 12/31/2025

Finding

290-2-3-.13(2)(d) requires that outside play areas be protected from traffic or other hazards by fencing or other barriers at least four feet in height and approved by the Department. Fencing material shall not present a hazard to children. A fence shall be provided around swimming pools to make them inaccessible when not in use. It was determined based on observation that the gate on the fence enclosing the outdoor play area was open, and could not be closed because part of the latch attached to the gate was missing. Additionally, the latch attached to the fence was not securely fastened to the fence.

POI (Plan of Improvement)

The Home will enclose the outside play area(s) with a four-foot high fence or other Department-approved barrier and inspect regularly to ensure fencing material is safe and any hazards identified are repaired or replaced. The Home will install or repair a fence around swimming pools that makes them inaccessible to children.
