290-2-3-.13 Playgrounds(CR)**Not Met****Finding**

290-2-3-.13(2)(a) requires that outdoor play areas be kept clean and free of hazards such as exposed sharp corners of concrete or equipment, rust and splinters on equipment, broken glass, open drainage ditches, holes and stagnant water. It was determined based on observation that over growth of vegetation is accessible to children through out the play area along the bottom of the hill that runs the length of the backyard. Additional hazards were accessible along the back portion of the yard, yard debris piles, fire pits, miscellaneous household items, a storage shed, paint cans, and a chainsaw.

POI (Plan of Improvement)

The Home will repair any and all identified outdoor hazards and will monitor playground daily or more often as needed to ensure that the Home's outdoor play area is kept clean and free of hazards. The provider will prevent access to vegetation over growth or remove the vegetation. The provider will prevent access to hazards by removal or prevent access with a 4 foot barrier.

Correction Deadline: 6/9/2025

Finding

290-2-3-.13(2)(d) requires that outside play areas be protected from traffic or other hazards by fencing or other barriers at least four feet in height and approved by the Department. Fencing material shall not present a hazard to children. A fence shall be provided around swimming pools to make them inaccessible when not in use. It was determined based on observation that the yard is not adequately fenced and showed multiple areas where gaps in the fencing were present. The following gaps were observed on the back right perimeter fence: 6 inches by 25 inches, 11.5 inches by 58', 7 inches by 58 inches, and 9 inches by 58 inches. Additionally, a gap measuring 4 inches by 38 inches was observed on the back left perimeter fence. Also, a missing fence board and broken board was located along the back perimeter fence. The consultant discussed adding additional fencing to close off the upper portion of the play area to ensure that children do not have access to the hazards in the back of the yard. Cones were present at the time of the visit to visually create a barrier between the play area and the upper-back portion of the yard.

POI (Plan of Improvement)

The Home will enclose the outside play area(s) with a four-foot high fence or other Department-approved barrier and inspect regularly to ensure fencing material is safe and any hazards identified are repaired or replaced.
