Finding

591-1-1-.33(3)(a)-(k) requires each Staff member with direct care responsibilities to complete health and safety orientation training within the first 90 days of employment. The state-approved training hours obtained will count toward required first year training hours. The training must address the following health and safety topics:

a) prevention and control of infectious diseases (including immunizations); b) prevention of sudden infant death syndrome and use of safe sleeping practices; c) administration of medication, consistent with standards for parental consent; d) prevention of and response to emergencies due to food and allergic reactions; e) building and physical premises safety, including identification of and protection from hazards that can cause bodily injury such as electrical hazards, bodies of water, and vehicular traffic; f) prevention of shaken baby syndrome, abusive head trauma and child maltreatment; g) emergency preparedness and response planning for emergencies resulting from a natural disaster or a human-caused event (such as violence at a child care facility); h) handling and storage of hazardous materials and the appropriate disposal of bio contaminants; i) precautions in transporting children; j) recognition and reporting of child abuse and neglect; and k) child development to include all major domains: cognitive; social and emotional; physical development and motor skills; communication, language, and literacy; and approaches to play and learning. It was determined based on a review of records, two staff members (staff members #4, date of hire November 24, 2025 and #5, date of hire March 30, 2026) did not have evidence of completing health and safety orientation training within the first 90 days of employment.

POI (Plan of Improvement)

The Center will develop and implement a plan to schedule and track this training for all employees based on their hire dates and will ensure that the training includes all required components as required.
