If you do not have this liability insurance, you are required to post a notice with ½ inch letters in a conspicuous location in the program, notify the parent or guardian of each child in care in writing, obtain their signature to acknowledge receipt and maintain this written acknowledgment on file at the program at all times while the child attends the program and for 12 months after the child's last date of attendance. (O.C.G.A. Section 20-1A-4)

Finding

591-1-1-.08(1) requires the Center Staff to maintain a file for each child while such child is in care and for one year after that child is no longer enrolled. In order for the file to be complete, the file shall contain the following: child's name, birth date, sex, address, living arrangement, name of school if applicable; names of both Parents, home and work addresses, and home and work telephone numbers; name(s) and addresses of the person(s) to whom the child may be released including address, telephone numbers, relationship to child and to Parent(s), and other identifying information; name(s) and telephone number(s) of person(s) to contact in emergencies when the Parent cannot be reached; name and telephone number of the child's primary source of health care; and a statement regarding known allergies, physical problems, mental health disorders, intellectual disabilities or developmental disabilities which limit the child's participation in the program. It was determined based on a review of children's records that none of the records for the five children reviewed contained complete information for both parents' employers. Additionally, one child's record did not include complete information for all persons listed to whom the child could be released.

POI (Plan of Improvement)

Center staff will develop a plan that includes how to obtain all required information for currently enrolled children and how to ensure this is done for future enrollees as well. The plan will also include how and where to maintain files for the required amount of time. The plan will be implemented and followed.

591-1-1-.25 Physical Plant - Safe Environment(CR)**Met****Comment**

The Center appeared clean and well maintained on this date.

591-1-1-.26 Playgrounds(CR)**Not Met****Finding**

591-1-1-.26(7) requires that climbing and swinging equipment be anchored. It was determined based on observation that neither of the swings and climber combinations were anchored as required. The metal swings were not anchored on the side farthest from the entrance and the wooden combination swing/slide/climber combination set was not anchored on either side.

POI (Plan of Improvement)

The Center will remove or repair equipment that is not anchored and will regularly inspect the equipment to ensure it remains anchored.

Correction Deadline: 4/23/2026

Finding

591-1-1-.26(8) requires climbing and swinging equipment to have a resilient surface beneath the equipment and the fall zone from such equipment must be adequately maintained by the Center to assure continuing resiliency. It was determined based on observation that there was inadequate resilient material beneath and in the fall zone of the two swinging and climbing equipments on the playground. The resilient material placed beneath and around the metal swing set measured less than three inches in all areas. The resilient material beneath and in the fall zone of the wooden swing/slide/climber combination measured less than three inches in depth and none was present beneath the swings in the paths of the swings where the dirt was exposed and hard packed. Based on the height of the equipment, a minimum depth of three inches is required for both pieces of equipment.

POI (Plan of Improvement)

The Center will add additional resilient surfacing to the fall zones where needed and check daily, adding resilient surfacing as needed to maintain adequate resiliency.

Correction Deadline: 4/23/2026

Finding

591-1-1-.26(9) requires the playground to be kept clean, free from litter and free of hazards, such as but not limited to rocks, exposed tree roots and exposed sharp edges of concrete. It was determined based on observation that the boards surrounding the metal swing set and the wooden swing/slide/climber combination piece that were placed as a barrier for the resilient material posed a safety hazard to the children. Several of the boards were bowed and not flush with the ground which created a tripping hazard. Additionally, several of the boards were disconnected from each other and had hardware exposed, including a protruding bolt that posed a safety hazard to the children. Boards placed around the back porch were also bowed and posed a tripping or other safety hazard. An exposed bolt on the wooden structure was also observed that should not protrude longer than two ring or be fitted with a safety cover. The placement of the wooden structure was also less than four feet from the fence and did not provide adequate clearance for children swinging or climbing on this equipment.

POI (Plan of Improvement)

The Center will remove any litter and fix or remove hazards from the playground and will routinely monitor the playground and remove litter and hazards.
