Director Requirements Not In Compliance

365 - Altered/Falsified Records Not In Compliance

922 KAR 2:090. Section 10. Director Requirements and Responsibilities.

(1) A director shall:

(n) Assure each mandatory record specified in Section 9 of this administrative regulation has not been altered or falsified;

## Findings:

General: Based on review of documentation, one (1) staff (DOH: 11/24/15) file contained a TB skin test screening form that had been altered and/or falsified. The staff person's TB skin test screening form appeared to have been altered and/or falsified as the markings on the form were exactly the same as another staff person's screening form. Based on interview with a health department employee, the surveyor verified that the mentioned staff person had not been at the health department on the date that was documented on the TB skin test screening form and that a TB skin test screening form had not been completed at that health department. During interview, the director and Staff #1 both stated that they were not aware that the TB skin test screening form had been altered and/or falsified. Based on review of documentation and interview, it was confirmed that the TB skin test screening form had been altered and/or falsified.
