<b>Findings:</b>	
<p>General: Based on observation, this regulatory requirement was not met. The surveyor toured the infant classroom at 2:13PM and observed a child standing up in a crib. The only item in the crib with the child was an empty bottle. The surveyor toured the classroom two additional times during the visit and observed the child still standing up in the crib. No activities or toys were available to the child during this time. It is important to note that the staff person working in the classroom was sitting in an adult chair in the room at the time and observed using a breast pump on herself.</p>
