	No. of Children Present: 56	

Inspection Report	
General Administration	In Compliance
Director Requirements	Not In Compliance
350 - Health, Safety, Comfort	Not In Compliance
922 KAR 2:090. Section 10. Director Requirements and Responsibilities. (1) A director shall: (l) Assure the health, safety, and comfort of each child;	
Findings: General: Based on interview and review of documentation, the child-care center failed to meet this regulation. The surveyor found that on 11/1/19, at approximately 8:10 a.m., a seventeen-month-old toddler cut three of her fingers on the plastic shield of a wall clock. The toddler received four stitches to close one of the lacerations on her middle finger. Interviews found that a staff person cleaning the top of the children's cubbies placed the damaged clock on a child-sized table within reach of the toddler. An interview with this staff person found that she was aware the clock was cracked. She stated that she forgot to remove the clock from the table and went to do something else. She stated that when she sat down at a different table, she saw the toddler near the child-sized table and thought to herself that she should remove the clock. The staff person stated when she walked toward the table; the toddler had already cut her fingers and was bleeding. The staff person stated she wrapped the toddler's hand with a cold washcloth and the toddler's mother transported the toddler to the emergency room. In short, the child-care center staff failed to provide for the health, safety, and comfort of a child enrolled.
