<p>922 KAR 2:120. Section 2. Child Care Services.</p> <p>(3)(a) Each center shall maintain a child-care program that assures each child will be:</p> <p>1. Provided with adequate supervision at all times by a qualified staff person who ensures the child is:</p> <p>a. Within scope of vision and range of voice; or</p> <p>b. The surveyor arrived at the facility at 9:00 AM and observed one staff person caring for three children who were eating breakfast. There were no other staff or children present in the building at the time. The surveyor asked the staff person how breakfast was prepared for the children. The staff person responded that she cooked the eggs and sausage in a skillet on the stove in the kitchen and further stated that the three children she had present at the time waited in the front entry way while she was cooking. The front entry way where the children were identified as being is not visible from the stove area in the kitchen; therefore, the staff person was not able to adequately supervise the children.</p> <p>2. At 9:29 AM, the surveyor observed the only staff person present in the facility escort three children down the hallway from the preschool classroom to the infant classroom. The staff person stated that she was taking the children down the hall to wipe their face from breakfast. One child (five-year-old) remained sitting at the classroom table in the preschool classroom during this time. The distance from the preschool classroom to the infant classroom down the hall was approximately 20 feet. The five-year-old child was not visible from the infant classroom; therefore, adequate supervision was not provided.</p> <p>3. At 9:33 AM, the surveyor observed the staff person escort the three children from the infant classroom, back through the front entry way, through a door that enters a hallway on the opposite side of the building and into the children's bathroom area. The door that leads into the hallway was closed while the staff person and the children were in the children's bathroom area; therefore, the five-year-old child was not visible from the children's bathroom area and adequate supervision was not provided. The staff person and the three children were in the children's bathroom area approximately four minutes.</p>

(b) Protect and assure the health, safety, and comfort of each child.**

Findings:

General: Based on observation, this regulatory requirement was not met. The following was found:

1. During a tour of the children's bathrooms, the surveyor observed a toilet cleaning brush and a plunger positioned beside the toilet in both the girls' and the boys' bathrooms and they were accessible to the children. This manner of storage is not sanitary and promotes the spread of germs.

2. At 9:29 AM, the surveyor observed a two-year-old child drinking from a sippy cup while walking down the hallway with her group. The child dropped the sippy cup on the hallway floor and a one-year-old child walking behind her picked up the cup and starting drinking from it. The staff person then took the cup from the child and told her that it was not hers. Children drinking from the same cup is considered a health hazard.

One staff person (hire date: 4/5/21) had a copy of a child abuse and neglect check (CAN) that had been submitted for processing; however, the results had not yet been obtained. This staff person was observed working alone with children when the surveyor arrived at the facility at 9:00 AM and continued to work alone until the staff person in charge arrived at approximately 9:40 AM. A review of staff files during the inspection found two staff that did not have the date of employment listed in their file. After speaking with the two staff in question and an administrative staff person, the staff person in charge verbally identified the dates 4/19/21 and 4/5/21 as the hire dates.

(5) Cardiopulmonary resuscitation (CPR) and first aid training shall be in addition to the fifteen (15) clock hours requirement in subsection (16) of this section.

Findings:

General: Based on review of documentation, observation, and interview, this regulatory requirement was not met. At the time of the survey, it was found that only one staff out of six was certified in infant/child CPR and infant/child first aid. This staff person (hire date: 5/1/19) is currently on medical leave; therefore, no one was on duty at the facility on 4/23/21, who was certified in CPR or First Aid. The staff person in charge stated that the staff person started medical leave approximately two weeks prior. The staff person in charge stated that she/herself was certified; however, a review of the certification card in her file found that it was no longer valid as of 3/2021. It is also important to note that the staff person in charge did not arrive at the facility until approximately 9:40 AM.

Findings:

General: Based on observation, this regulatory requirement was not met. The following was found:

- 1. An inspection of the facility's first aid kit found that it contained medication (Neosporin + Pain Relief cream, Benadryl itch stopping cream and two small packets of Tylenol). The first aid kit was unlocked; therefore, medication was not properly stored.
- 2. The surveyor observed a tube of Boudreaux Butt Paste and a tube of sunscreen positioned on top of plastic storage containers in the preschool classroom throughout the entire inspection. These tubes of medication were accessible to the children and they were not labeled with a child's name.

The staff person in charge stated that she was not aware of the metal pipe being on the playground and further stated that it must belong to the church.
2. A concrete step containing green indoor/outdoor carpet was found in disrepair. The carpet was split open down the middle and was curling up which created a trip hazard. All staff and children use this step to enter and exit the playground area.

755 - Protective Surface

Not In Compliance

922 KAR 2:120. Section 4. Premises Requirements.

(21) A protective surface shall:

(a) Be provided for outdoor play equipment used to:

- 1. Climb;**
- 2. Swing; and**
- 3. Slide; and**

(b) Have a fall zone equal to the height of the equipment.

Findings:

General: Based on observation and interview, the facility failed to provide protective surfacing for equipment used to climb and slide. During a tour of the outdoor play area, the surveyor observed a plastic climber/slide structure (approximately two feet tall). A black weed cloth was observed visible around most of the structure with sparse mulch on top; therefore, this did not provide sufficient fall zone cushioning for the children.

The staff person in charge stated during interview that she was in process of purchasing new mulch for the playground.
