Findings:																																																							
<p>General: Based on Interview, a three (3) month old child was found to be in the same room with three (3) one (1) year olds, two (2) two (2) year olds, five (5) three (3) year olds and two (2) four (4) year olds totaling a group size of thirteen (13). Two (2) staff members were present, but both were not in the room together for the duration of time all children were present. Staff reported that two (2) additional infants were brought to the room by parents, which would have increased the total group size to fifteen (15). A review of the attendance records for the day in question, 9/19/17 confirmed the number of children present.</p>
